Subject: - PROTECTION OF EXPLORATION & PRODUCTION (E&P) COMPANIES'

STATIC INSTALLATIONS

Dear all,

General: - This letter is requested to be read in conjunction with our similar letter No. KPOGCL/1-59-0071-D/KN 2978/2015 dated 01-Aug-2016 (bearing subject, Protection Of Exploration & Production Companies' Convoys during Move). Since all such moves have to terminate in the establishment of Static Installations/Facilities i.e. Base Camp, Fly Camp or establishment of a Rig Position followed by erection of Huge Productive Installations, it is therefore imperative that a fool proof Security to be afforded to the said Static Positions/Installations/Facilities.

In relentless pursuit for Energy Security of Pakistan

2. In order to achieve the above, following measures are requested to be adopted by all concerned.

a. **Obtainment of NOC in Khyber Pakhtunkhwa.** Following steps are required to be undertaken for the said obtainment:-

- (1) Concerned Operator E&P Company to forward KPOGCL, the already obtained NOC of it's Block (from DGPC), **at least one month before the commencement of it's activities, along with Gantt Chart.**
- (2) Concerned E&P Company to further forward KPOGCL a request, in writing, for the NOC/Security Clearance of the particular activity i.e. whether establishing a Base Camp, Fly Camp or a Rig Position or erecting some Huge Productive Installation, it has to perform, at the exact place, within the said Block, **at least one month before the commencement of it's activities, along with Gantt Chart.**
- (3) KPOGCL, in turn shall make sure the said NOC/Security Clearance is obtained, on priority, from Home & Tribal Affairs Department, Government of Khyber Pakhtunkhwa.
- (4) In case of Expatriates staying in/visiting the said Static Installations/Facilities, concerned E&P Company to forward KPOGCL, relevant NOC/Security Clearance, already obtained by the said E&P Company, from Prime Minister's Board of Investment & Trade, through DGPC, along with a photocopy of

their passports duly endorsed with a valid visa. The said E&P Company to specify the exact duration of stay/visit of the Expatriates, as well. KPOGCL, shall, again, in turn make sure the said NOC/Security Clearance is obtained, on priority, from Home & Tribal Affairs Department, Government of Khyber Pakhtunkhwa.

- b. **Legal formalities for land acquisition:-** All legal formalities for land acquisition shall be settled by the relevant staff of the concerned E&P Company after the said NOC/Security Clearance is obtained (Para 2 a (2) ante refers).
- c. **Activities prior to the occupation of site:-** After the said NOC/Security Clearance is obtained (Para 2 a (2) ante refers) and all the legal formalities are fulfilled (Para 2 b ante refers), KPOGCL shall arrange a Joint Security Evaluation Team (JST) comprising concerned District Police Official, concerned District Administrative Official, PAK Army Official, KPOGCL's concerned Security Official and client Exploration and Production/Services Company's Official so as to carry out a Joint Security Evaluation/Risk Assessment/Tactical Appreciation of the said proposed Static Installations/Facilities, duly identified by client Exploration and Production/Services Company's Official, under the SVEP (Sensitive, vulnerable, establishments, places) Act 2015. JST shall carry out Security Evaluation/Risk Assessment/Tactical Appreciation on the following lines:-

(1) **Ground configuration:-** Ground configuration of the said proposed Static Installation/Facility (Base Camp, Fly Camp or a Rig Position or erecting some Huge Productive Installation) should be evaluated/described as follows:-

(a) **General description.** Description of the ground should be specified i.e. it is plain, desert, mountainous or semi mountainous. Less Rig Position/drilling sites, JST may altogether reject the location of the proposed Static Installation/Facility, if it feels it is altogether not defensible and may order the occupation of yet an alternate site for the said Static Installation/Facility, which it feels to be more feasible, from Security point of view, in the surrounding area.

(b) **Routes/Approaches.** They should be described as follows.

- i. Length and classification of all the major ones from the point originating from each DPO's Area of Responsibility till the location of the proposed camp
- ii. Location and description of bottle necks en-route.
- iii. Likely ambush sites and known guerilla areas en- route.
- iv. Identification of alternates and laterals en-route.
- v. Location of friendly forces en-route.
- vi. Obstacles en-route.
- vii. Important Communication Centres (cities, villages, towns, trade centres) en-route.

- (c) Basing on the ground configuration stated at Para 2c (1) ante following actions to be dictated by JST.
- i. In the event of the said proposed Installation/Facility's area being mountainous or semi mountainous the relative heights overlooking the camp must be ordered to be occupied in strength, by establishing picquets/outposts/trenches etc and the said strength i.e. number of Security Personnel clearly specified. This shall form the Outer Most Cordon. Similarly, in case the said proposed Installation/Facility's area is plain or desert Outer Most Cordon must, as well, also be ordered to be formed at least 400 meters away from the camp, in strength, by establishing picquets/outposts/trenches etc and again the said strength i.e. number of Security Personnel clearly specified, as well. In either of the case, it must be ensured that the Outer Most Cordon formed through the establishment of picquets/outposts/trenches must have an interlock of fire and observation. The said arrangement of Outer Cordon shall provide depth, means of Early Warning and much added security/protection to the said Installation/Facility.
 - ii. Installation/Facility (Base Camp, Fly Camp or a Rig Position or erecting some Huge Productive Installation) could be

rectangular or square shaped. In either of the case it must having following characteristics:-

- (i) It should have 2 X cordons – the Inner Perimeter Cordon for the immediate protection of the resident Expatriates and the Outer Perimeter Cordon all along the periphery of the Installation/Facility. An antitank ditch (4feet x 6 feet) must also be dug in the immediate vicinity of the Installation/Facility so as to negate the forced entry of any explosive laden vehicle.
- (ii) Thick iron mesh sheet should be established for Inner Perimeter Cordon and Outer Perimeter Cordon with minimum height of 8 feet with 3x layers of barbed wire on top.
- (iii) Establishment of adequate number of concrete picquets for Inner Perimeter Cordon and adequate number of concrete picquets for Outer Perimeter Cordon of the Static Installation/Facility.
- (iv) Each picquet should be manned by 2x individuals round the clock who should be equipped with NVDS, Binoculars, automatic weapons, communication sets and search lights.
- (v) Central Control room should be established with communication bases and security LCDs which will

- (x) All security guards not available on duty should be placed as reserve for emergency as contingency within the camp site.
- (xi) Static Installation/Facility's ground must be made firm, if not already, so as to allow garrisoned troops to be able to react in an inclement weather.
- d. **Description of Locals/Threat Scenario**:- Religious, Sectarian and Ethnic details of each sub group and basing on that divides amongst them, if any, must be specified. Furthermore, their pulse and outlook towards the Government and such like developmental activities should also be made known. No go/threatened areas may also be identified. Depending on situation, nature of threat, if any, may, as well, be spelled out, as follows:-
- (1) Road blockages.
 - (2) Community issues.
 - (3) Bomb threats.
 - (4) Ambush along the route.
 - (5) Kidnapping/Abduction.
 - (6) Fire on the Static Installation and Vehicles.
 - (7) IEDs en-route.
 - (8) Forced entry of locals in the vicinity of the Static Installation.
 - (9) Break down of communications.
 - (10) Rocket attacks.

e. Proposed measures Foreigners' Security:-

- (1) 4x guards shall be deployed with each foreigner so that 1 guard remains deployed with the foreigner at all times in a shift of 06 hours each.
- (2) The guards deployed for the personal security of foreigners shall be armed with pump action rifle and 15 rounds each.
- (3) In addition, whenever the foreign workers leave the camp site for survey each foreigner must always be accompanied by 4 x security personnel duly armed with automatic weapons and protective gear.
- (4) Proposed Measures for Foreigners' Security during move:-
 - (a) There shall be no movement of the foreigners during night time.
 - (b) No movement shall be made without prior intimation to police and district administration.
 - (c) The movement of the foreigners shall only be undertaken in armored vehicles with a minimum protection level of B-6 and run flat tyres.
 - (d) 02 escort vehicles shall be arranged to escort the foreigners during movement. The escort vehicle shall comprise 05 guards each who shall be equipped with automatic weapons and personal protection gear. Every vehicle must contain jammers.

In relentless pursuit for Energy Security of Pakistan

(4) **Rehearsals**:- Friendly forces' location, in the vicinity of the Static Installations must be made known and rehearsals for redressing anomalous situations carried out. Furthermore, the nearest Police Station to the said Static Installation/Facility may be made responsible to immediately react in case the said Static Installation/Facility is threatened/under attack or some anomalous activity (both exogenous and endogenous) even of a minor nature is aroused, requiring protection

3. **Calculation of Overall Force, Vehicles and Specialized Equipment required**: - Basing on the above, JST shall render KPOGCL, an estimate of the Overall Force, Vehicles and Specialized Equipment required.

4. **Coordination**:- Further clarification/Coordination, could be carried out on Cell/E-mail and most preferably coordination meetings/conferences. Furthermore, Security Evaluation/Risk Assessment/Tactical Appreciation is a continuous process and is therefore liable to change and it may therefore be appreciated that each Security Evaluation/Risk Assessment/Tactical Appreciation may differ from the other depending on the ground configuration, level of threat and that of the nature of Static Installation/Facility i.e. whether it's a Base Camp, Fly Camp or a Rig Position followed by erection of a Huge Productive Installation. Therefore, estimation of overall resources may differ after they are finalized / rationalized meticulously by KPOGCL's relevant Chief Security Official and that of Client Company's Chief Security Official.
